Based on my assessment, I have determined it is medically necessary and appropriate to prescribe treatment today. For the patient's complaint, I am prescribing this device. The patient will benefit by helping her address any of the following: give support to weak muscles, improve patient's pain, improve patient's function, increase performance in activities of daily living, improve ambulation, reduce resting, slow degeneration, provide stability, provide support. Reduce pain by restricting the mobility of the trunk; reduce the risk of medical problems escalating the patient's present condition, facilitate healing following an arthritis or surgical procedure to the spine or related soft tissues; To support weak spinal muscles and/or a deformed spine. If the patient's pain persists or worsens and/or there is an acute trauma or arthritis related to this pain, the patient agrees and understands to go to the Emergency Room or follow-up with their Primary Care Physician for further testing and imaging that may be immediately necessary.
