The patient will benefit by helping her address any of the following: give support to weak muscles, improve patient's pain, improve patient's function, increase performance in activities of daily living, improve ambulation, reduce medications, slow degeneration, provide stability, provide support. Reduce pain by restricting the mobility of the trunk; reduce the risk of medical problems escalating the patient's present condition, facilitate healing following an injury or surgical procedure to the spine or related soft tissues; To support weak spinal muscles and/or a deformed spine. If the patient's pain persists or worsens and/or there is an acute trauma or injury related to this pain, the patient agrees and understands to go to the Emergency Room or follow-up with their Primary Care Physician for further testing and imaging that may be immediately necessary.

Mr RICHARDS is inquiring about utilizing orthotic bracing for his/her current conditions. His/her chief complaint at the time of this assessment is: **LOWER BACK, LEFT KNEE, RIGHT KNEE.**

Mr RICHARDS reports chronic **LOWER BACK, LEFT KNEE, RIGHT KNEE** pain for **MORE THAN A YEAR**. Patient states pain is **ACHY** with a pain scale of 7 and pain worsens with **BENDING**. Pain is experienced **SOMETIMES**. Previous treatments with heat, ice, medication and rest have been unsuccessful to control pain levels.

Patient is ambulatory and has weakness of the **LOWER BACK, LEFT KNEE, RIGHT KNEE** requiring stabilization for improvement of functionality. I am prescribing this **BACK, KNEE** orthosis for the following indication(s): to aid when the patient is **BENDING**, to aid in stabilization of the **BACK, KNEE**. My treatment goal(s) for the use of the prescribed **BACK, KNEE** orthosis are: improvement in patient's function, improvement in patient's pain.
